*IFP Conditions: Pulse Width≤10msec duty≤1/10

* All high power emitter LED products mounted on aluminum metal-core printed circuit board, can be lighted directly, but we do not recommend lighting the high power products for more than 5 seconds without a ap-propriate heat dissipation equipment.

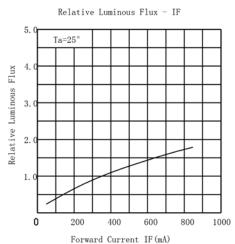

* Re-flow, wave peak and soak-stannum soldering etc. is not suitable for this products.

* Suggest to solder it by professional high power LED soldering machine.

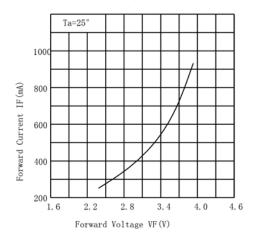

* Can use invariable-temperature searing-iron with soldering condition: ≤260 degree less than 3 seconds.
